REMARKS

This is intended as a full and complete response to the Office Action dated May 19, 2005, having a shortened statutory period for response set to expire on July 19, 2005. Please reconsider the claims pending in the application for reasons discussed below.

In the specification, the paragraph [0021] has been amended to correct minor editorial problems. In the drawings, Figure 1 has been amended to correct formalities.

Claims 1-17 are pending in the application. Claims 1-17 remain pending following entry of this response. Claims 1-4, 6-12, and 14-16 have been amended to correct formalities and to more clearly recite the features claimed. Applicants submit that the amendments do not introduce new matter and do not raise new issues.

Drawing Objections

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "8" has been used to designate both "delay elements" and "signal path". The drawings are also objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: reference numbers "7" and "9".

In view of the amendments to the specification and drawings to correct these formalities, Applicants submit that these objections have been obviated and request withdrawal of these objections.

Claim Objections

Claims 1, 3-4, 6-10 and 14 are objected to because of formalities. In view of the amendments to the claims, these objections are believed to have been obviated, and the claims are believed to be in condition for allowance.

Conclusion

The references made of record are noted. However, Applicants believe that a detailed discussion of the references is not necessary for a full and complete response to this office action.

Having addressed all issues set out in the office action, Applicants respectfully submit that the claims are in condition for allowance and respectfully request that the claims be allowed.

Respectfully submitted,
